```java
1    import java.util.Scanner;
2
3    public class Hello {
4
5        public static void main(String[] args) {
6
7            Scanner scnr = new Scanner(System.in);
8            String firstName;
9            String age;
10           String place;
11
12           System.out.print("Hello. What is your name?");
13           firstName = scnr.next();
14
15           System.out.print("It's nice to meet you," + firstName + ". ");
16
17           System.out.print("How old are you?");
18           age = scnr.next();
19
20           System.out.println("I see that you are still quite young at only "+ age + ".");
21
22           System.out.print("Where do you live?");
23           place = scnr.next();
24
25           System.out.print("Wow! I've always wanted to go to " + place + ".");
26           System.out.println(" Thanks for chatting with me. Bye!");
27
28           // gitHub changes!
29           // this is my comment
```

```
